HTML

What is html? Basic Architecture

03

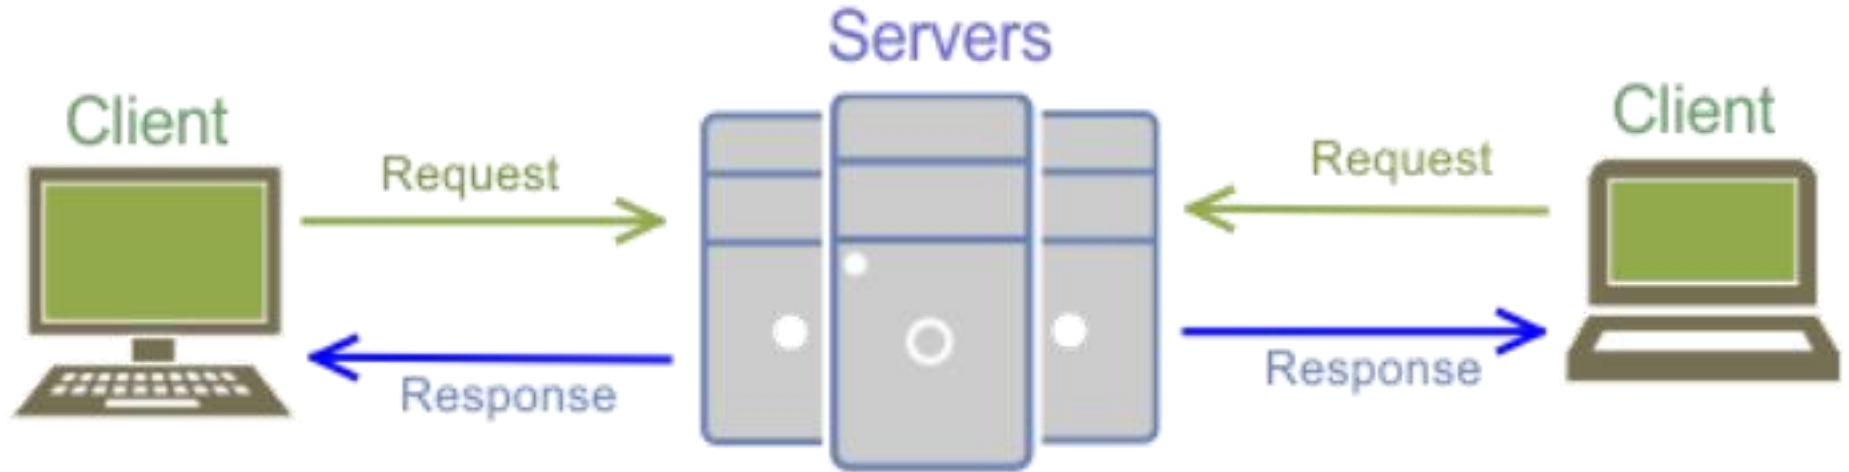

HTML5

Advantage of HTML5, Basic HTML5 document, HTML5 basic tags

Basics

Client Server Architecture

The Client makes request for service to server.

The Server responds to that request.

Basics

What is Client?

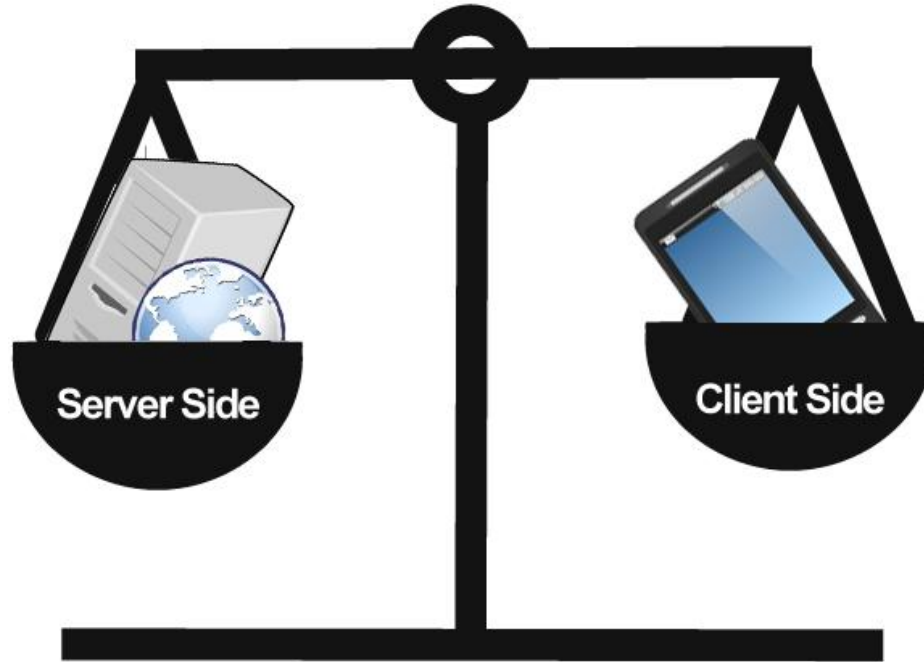

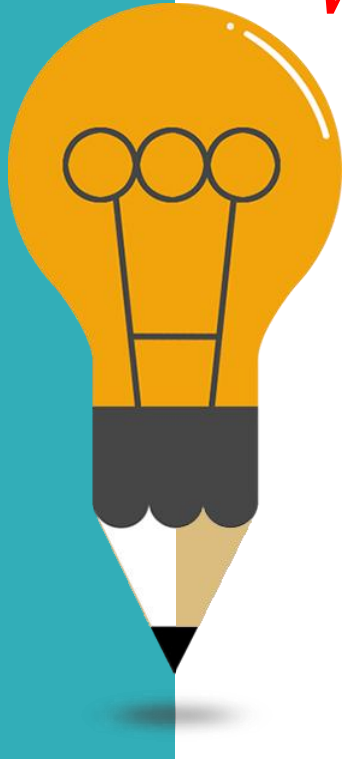

- ❖ A client is a end user who sends the request to the server and display the server response.

What is Server?

- ❖ A server is a computer or a programme that receives the request process it and gives out the response to the clients.
